Services That Make Business Work

Point 1 is a full-service commercial provider of low voltage system solutions in the greater SF Bay Area. Whether your project is new construction or a remodel, our expertise assures you a quality and timely installation and optimal system performance. Our services include:

NETWORKING

We offer a wide selection of networking cabling solutions including Category 5, LANs (fast Ethernet, gigabit Ethernet, wireless), Fiber Optics, and fusion splicing. We install all network jacks, network hubs, and routers – whether you are upgrading or deploying a newer, more cost-effective solution.

COMMUNICATIONS

We install any type of audio, video, data or voice wiring. We also install and support outdoor speakers, video intercoms, and music systems for a variety of business environments.

Integrated overhead paging and public address systems are a must for hospitals, warehouses, and medical offices. We offer the latest in hands free answering, adjustable volume and great sound quality ideal for any commercial environment.

AUDIO/VISUAL MEDIA

We custom design and install sound systems for your boardroom, school, store, theater, sports arena, church or auditorium. We also wire sound speakers and public address systems with a wide variety of modern and custom features.

FIRE/SECURITY/SAFETY

We offer a complete line of fire alarm network installations including fire alarm panels for small buildings or complete life-safety systems for high-rise buildings. Our products allow you to monitor trouble conditions that occur on any alarm panel in an entire building or several buildings on a campus network.

We also provide the latest in commercial access control systems, intercom systems and CCTV surveillance systems that are essential to maintaining the safety of your office, parking and stairwell environments.

PATIENT/RESIDENT CARE

The ability to call for help is critical for hospitals and assisted living environments. We offer a wide variety of custom options for nurse call or call systems including patient/resident monitoring, data logging, and space-conservation. We can tailor a wide range of station types and capacity to fit your needs with full audit control.

SERVICES ON DEMAND

Our extensively trained technicians are on-call 24 hours a day, 7 days a week to respond to your emergency, troubleshooting or inspection needs. With our comprehensive on-site services, your organization can enjoy the convenience, maximum flexibility and cost savings of a single source for all your service needs.
